## Loss Prevention Solutions

by

# SPOSgroup

A leading provider of retail marketing solutions

*"We design, make, procure, sell, manage & supply the products  
that sell your products"*

Difficult times unfortunately drive a spike in retail loss.  
Our proven range covers key 'risk areas' and we're always developing new solutions.

This presentation covers the five key areas that are primary targets:

## HEALTH & BEAUTY

Supermarkets & Pharmacy

## GENERAL RETAIL

Supermarkets, Convenience & Hardware

## TECHNOLOGY

Supermarkets & Consumer Electronics

## LIQUOR

High end and mid range Wine & Spirits

## HARDWARE

High Value Items

## Slide-Guard Modular Anti-Sweep System

This unique solution maintains complete product visibility whilst eliminating sweeping. The clear panels slide left and right allowing customers to navigate to their desired product though only a few products are accessible at any given point in time.

Front rail showing standard short retainer behind "slide-guard" retainer

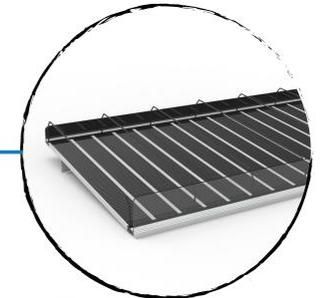

## Slide-Guard Modular Anti-Sweep System

Polycarb shroud can be any standard colour

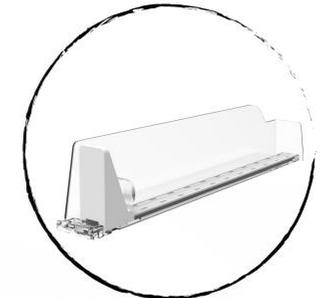

Pushers and dividers keep stock fronted and tidy

Can accommodate a wide range of auto fronting solutions

FlexRoller system

Separate solution for top shelf of gondolas

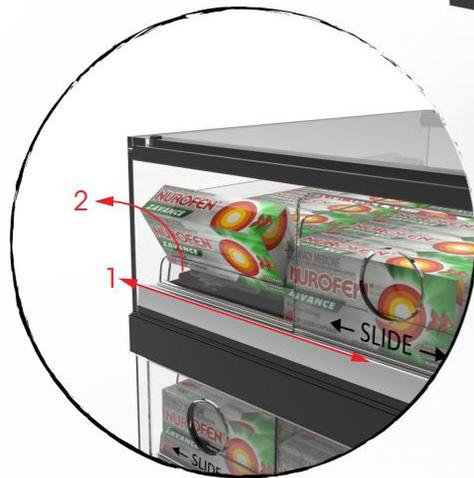

ProPusher system

Same solution used for any shelves with a shelf above

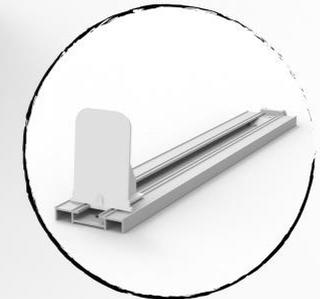

Versa pusher system

Customer interaction

Unit can be custom made to suit any shelf requirement

Breakable pusher system

## Anti-Sweep Retrofit System

The SPOS Anti-Sweep Retrofit System prevents product sweeping for hanging items by ensuring that only one item at a time can be removed. With an added benefit that stock removal is a 'two handed' operation.

- The anti-sweep device is easily applied to existing pegboard hooks up to 6.35mm diameter.
- Stock does not need to be removed from the hook when installing.
- The system also includes an optional Backplate and Pusher.
- The Backplate prevents theft of products on hooks by securing the hook to the pegboard.
- And the Pusher keeps products faced up.
- Both accessories are installed without tools and the main system secures the anti-sweep device to the hook with an Allen Key.

Anti-Sweep System with Pusher

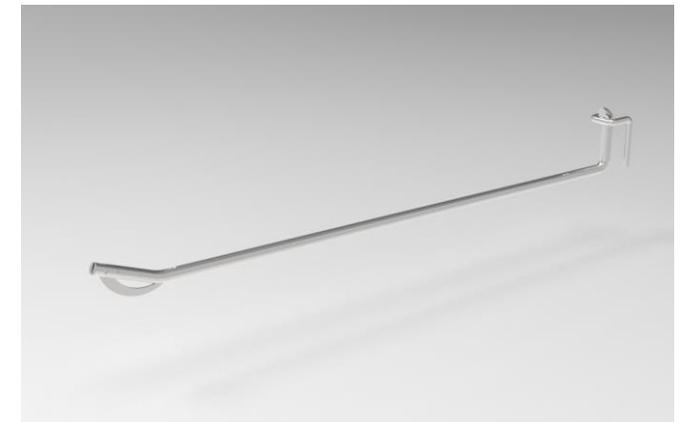

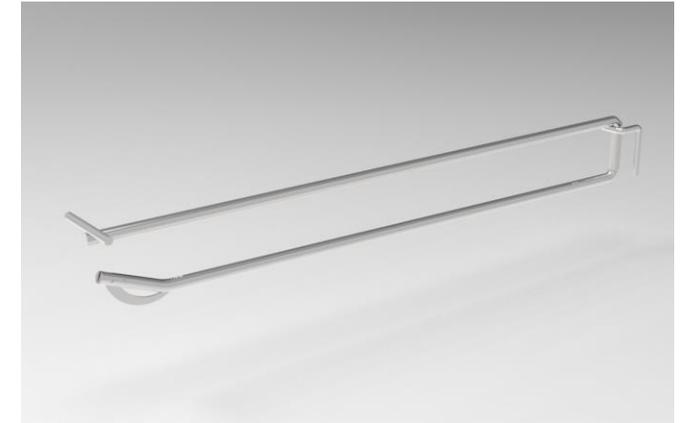

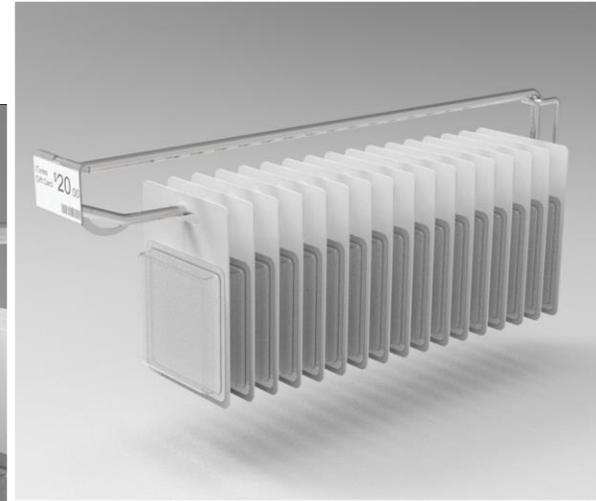

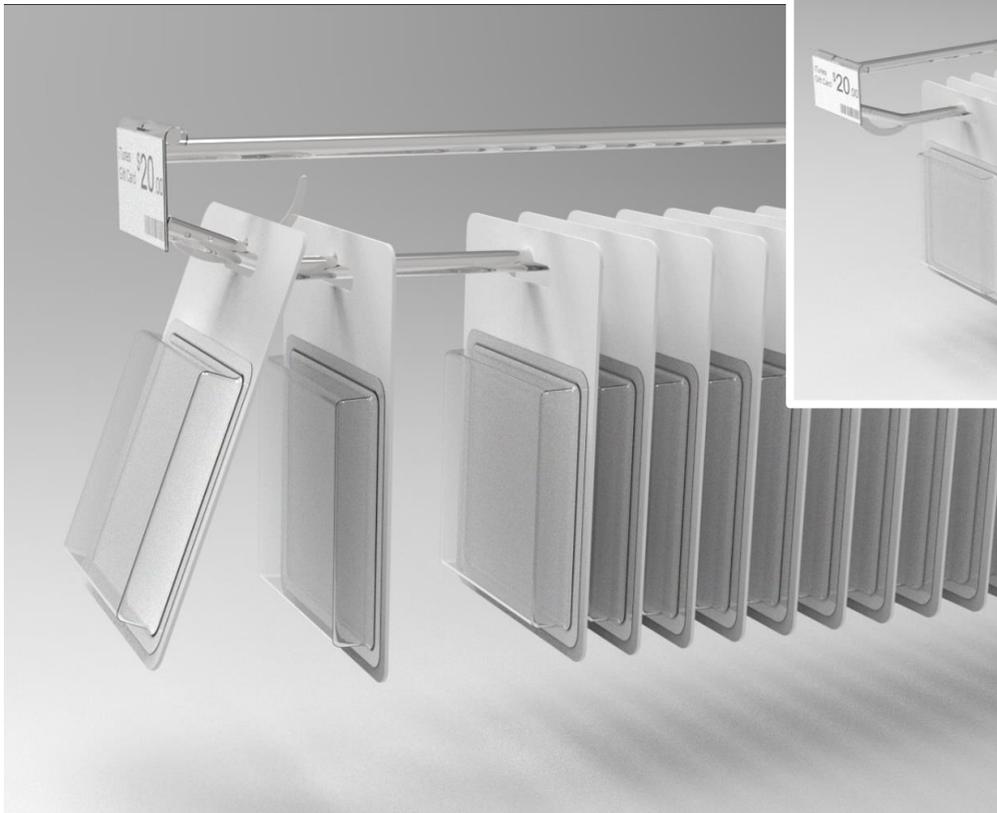

## Anti-Sweep Single Prong Hook

Designed by the SPOS Group over 15 years ago, this single prong anti-sweep hook has been deployed in categories such as Cosmetics, Gum and Razor Blades. Unlike large loop hooks, this item suits a broad cross-section of products.

- The hinged pivoting stopper prevents removal of more than one item at a time.
- Operates as normal hook when products are removed individually.
- Paper Ticket Holders & ESL Holders are both available.
- Can be produced to suit pegboards, cross-bars or slatwall.

*300mm Single Prong Hook  
Designed to suit cross-bars*

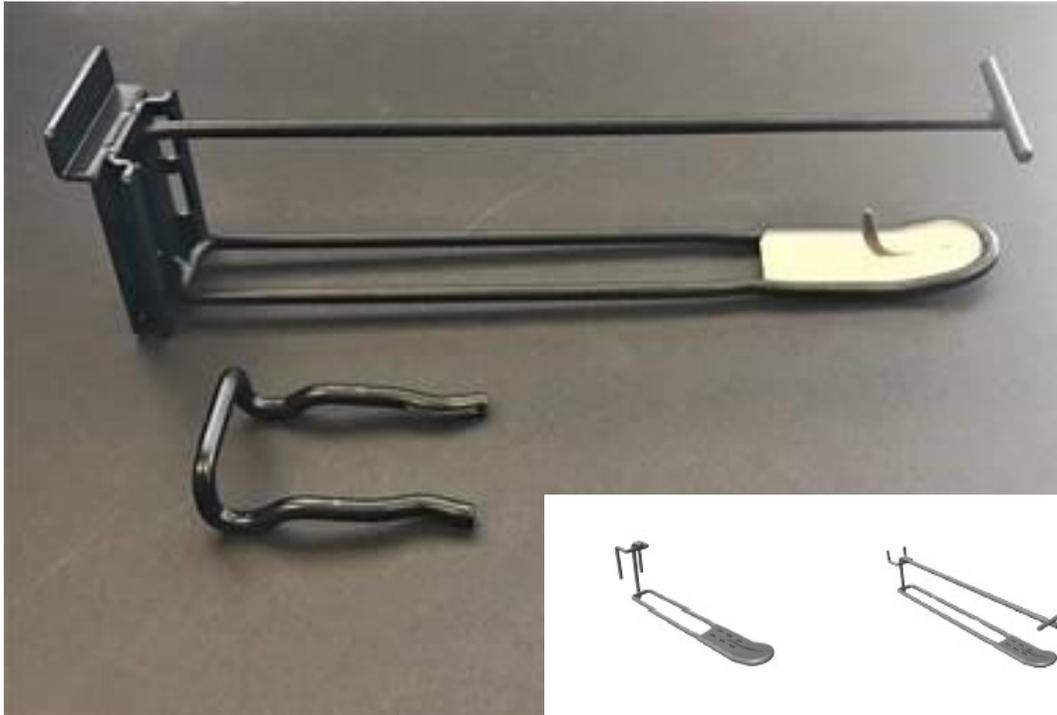

*Hinged stopper rises when the first item is removed*

## Anti-Sweep Loop Hook

The SPOS Anti-Sweep Hook prevents product sweeping for hanging items by allowing customers to only take one product at a time.

- Available in a variety of lengths and Hook types.
- Simple design provides a and durable solution
- Can be retrofitted to all pegboard types
- Flipscan version available

## Ridged Security Hook

The Ridged Security Hook is an effective anti-sweep solution with the added benefit of reducing stock-weight which lowers inventory costs and exposure to theft.

- Simple installation - ideally during planogram resets
- Suits all pegboards and locks in place to prevent hook removal
- Engineered to reduce sweeping and loss by significantly slowing stock removal
- Hinged Flipscan front for ticketing.
- Ideal for a large range of Health & Beauty, Technology, Grocery and Hardware categories.

# SECURITY HOOKS & LOCKS

LIQUOR

## Single Ridge Hook

The simply designed Camel Hump Hook is suitable for medium risk categories though isn't recommended for high-risk products. Hooks are available to suit Fastbacks, Bar Systems or Slat-Wall.

## Single Ridge Hook with Flip-Scan

The simply designed Camel Hump Hook is suitable for medium risk categories though isn't recommended for high-risk products. Hooks are available to suit Fastbacks, Bar Systems or Slat-Wall.

## Anti-Sweep Hook Lock

A cheap alternative to completely secure products. The magnetic lock can only be opened by a staff member using the Mini-Detacher. This item suits 6mm, 7mm & 8mm hooks.

## Anti-Sweep Double Loop Hook Lock

A cheap alternative to completely secure products. The magnetic lock can only be opened by a staff member using the Mini-Detacher (refer below).

## Anti-Sweep Double Bar Hook Lock

Tailored specifically for dual prong hooks providing the most cost effective form of hang sell protection. The magnetic lock can only be opened by a staff member using the Mini-Detacher (refer below).

## Mini-Detacher for Locking Hook & Hook Locks

A high-quality compact detacher with key ring attachment. Suits all magnetic products listed above.

## Bottle Lock

The worlds leading bottle lock option with nearly 24 million units sold to major worldwide retailers, This product provides the ultimate in bottle protection and ease of use

Note - The next generation version (soon available) features a universal design to suit all bottle sizes.

## ProCab Security Cabinet

ProCab is a loss prevention solution which is designed to protect high value items. The unit can combine with both InterGlide and ProGlide Systems.

- A drop-in shelf solution which houses mid to high value items such as Liquor (Wine & Spirits), Technology, Hardware or Health & Beauty items such as Perfume.
- Hinged Doors force a 2-handed operation which acts as strong deterrent
- Proven to reduce loss by 25-35% when combined with the InterGlide slow-release pusher system

## SecuriFlex Security System

These security pusher dividers are a proven anti-sweep solution dispensing only one product at a time.

They work with the FlexRoller divider mounting system and are compatible with both FlexRoller Shelves as well as our custom Flat Shelves.

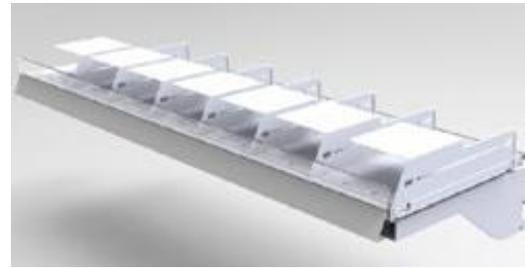

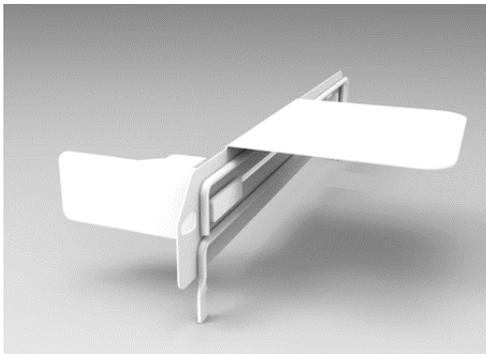

The most effective application involves the use of our Pull-Out Shelf with a reduced depth which enables fast replenishment, stock rotation, lower inventory costs and less exposure to loss.

- Secure lock in dividers reduce sweeping
- Adjustable bracket - 305mm, 405mm & 505mm shelf depths
- Easily adjusts to shelf depths
- Pushers extend to the shelf edge
- Shelves pull-out for easy filling and stock rotation
- Pusher locks at the rear for fast replenishment
- Locking latch on pull-out handles

Pull Out Flat Shelf  
- also available with rollers

Security Pusher Divider  
- Pusher & Canopy

## SecuriFlex Security System

Considerations and options when designing your solution are as follows:

### SHELF TYPES

- FlexRoller Standard Shelf
- FlexRoller Layover Shelf
- FlexRoller Pull-Out Shelf
- Custom Flat Shelf – with FlexRoller Divider Mounting System

### SHELF DEPTHS

- 305mm
- 405mm
- 505mm

### DIVIDERS

- Standard Divider with Canopy – if using FlexRoller
- Divider with Pusher & Canopy – if using the Flat Shelf

Standard FlexRoller Shelf

## FlexRoller Gate Lock System

An adjustable divider system with an integrated security door which ensures that 'two hands' are required when shopping the category. This has been proven to dramatically reduce loss.

The system can be retro-fitted to existing FlexRoller Shelves. Custom design is required to ensure Brand sizes and variants can be accommodated.

- For use in conjunction with FlexRoller or Pusher Systems
- Lift hatch ensures that only one item can be taken at a time
- Two handed operation

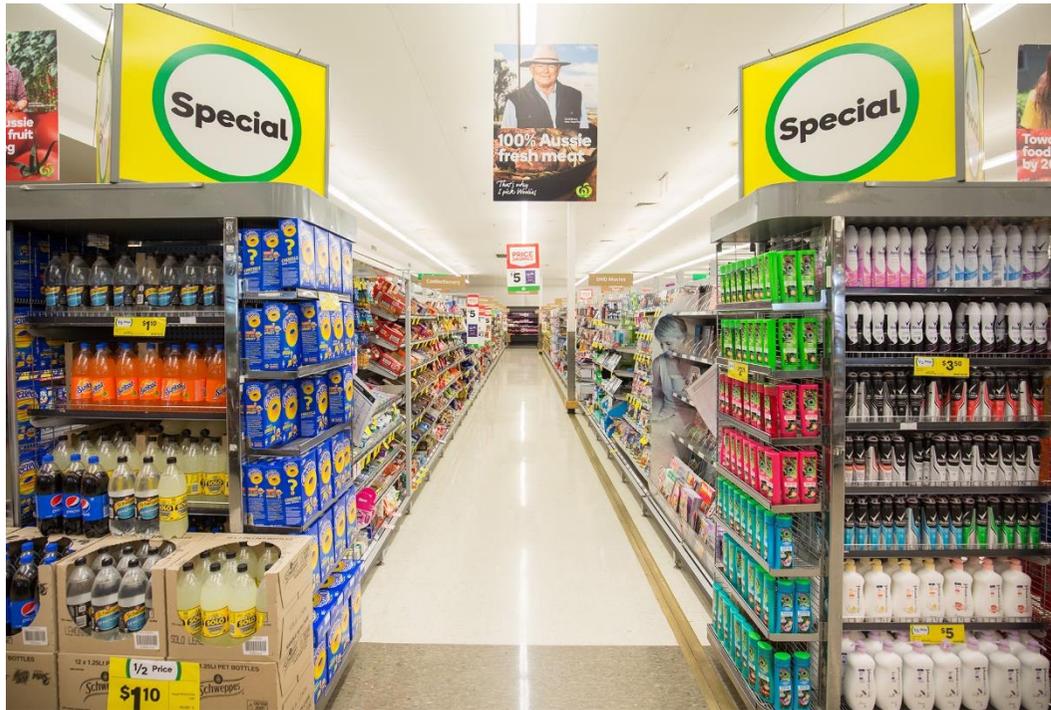

# ANTI-SWEEP SHELF SOLUTIONS

## Gravity Feed Dispensers

Gravity Feed Dispensing Displays allow for strong branding and messaging, simplify product selection and keep items safe from sweeping.

- Gravity Feed Dispensers can be manufactured using a variety of designs and materials to meet a budget.
- Units can be permanently branded or have a series of interchangeable graphic panels to future proof the displays.
- Any size or mounting option is in scope – full gondolas, shelf top, freestanding.

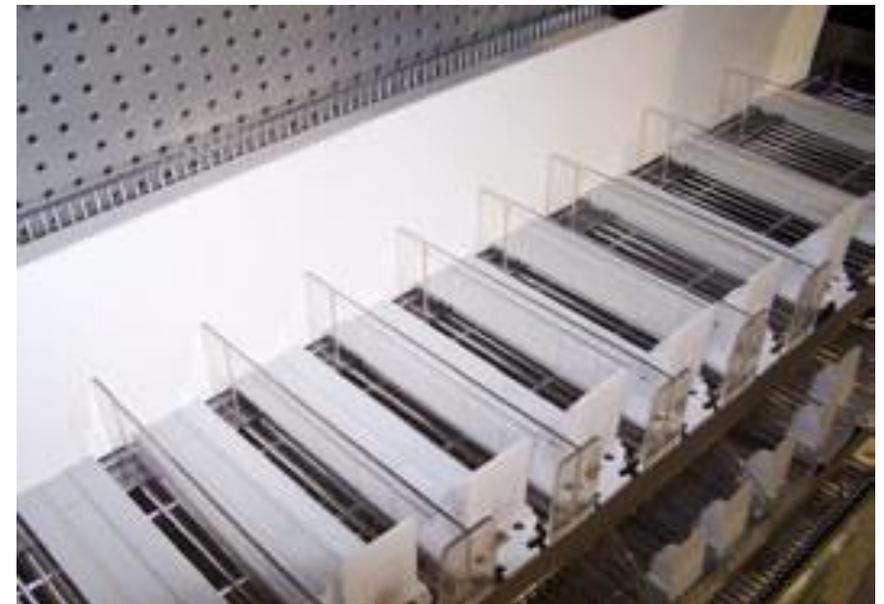

## Shelf Limiter Kits

The SPOS Shelf Limiter Kit is a suit of products that combine to reduce inventory, improve presentation, reduce labour and utilise existing shelves to act as a barrier to theft - sweeping.

- Kit includes acrylic limiter, breakable dividers and pushers and rails
- Can be used in all non-hanging categories
- Reduced shelf capacity lessens exposure in high-risk categories
- Reduces date code issues in slow moving categories
- Reduces held inventory value in store
- And the addition of dividers and pushers improves presentation and reduces labour costs

White acrylic Shelf Limiter which is fixed to the shelf with button clips can be produced at a variety of depths.

## FlexRoller Narrow Overlay

The FlexRoller Narrow Depth Shelf Overlay restricts shelf capacity and when shelves are positioned close together it creates a barrier to theft – sweeping.

- Kit includes FlexRoller Shelf Overlay, acrylic limiter (rear), front riser and dividers
- Can be used in all non-hanging categories
- Reduced shelf capacity lessens exposure in high risk categories
- Reduces date code issues in slow moving categories
- Reduces held inventory value in store
- And the addition of dividers and pushers improves presentation and reduces labour costs

## Secure Counter Unit

Ideal for the Service Desk or Checkouts, this self-fronting counter unit delivers perfect product presentation whilst protecting stock. Staff access products from the rear of the unit for customers.

Small plate steel attachment points to attach panels or individual modules together

Front panel is secured in place and stock is only accessible by opening OR lockable door at rear

Optional added security lockable door (for closing up out-of-hours if required)

Stackable FlexRoller unit suitable for rear loading and picking of stock

Customer facing side (completely enclosed)

Modular design allows for units to be stacked and bolted together
