RETAIL SOLUTION SPECIALISTS

THE CHALLENGE ...

A large proportion of customers are 'mission oriented' with an almost singular focus on fast transactions. The challenge is a lack of dwell time which minimises sales opportunities.

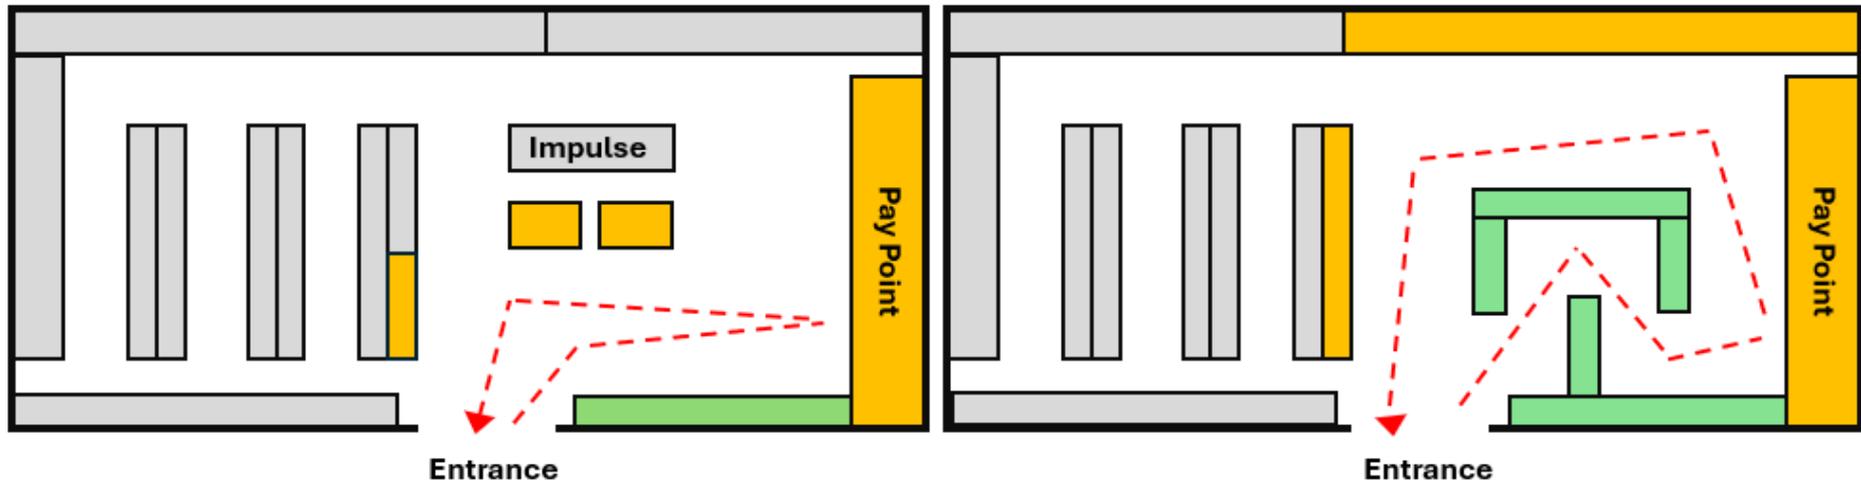

SOLUTION ...

The highest conversion to sale occurs when customer are 1 - 1.5 metres from an item, so fixture positioning and managing customer movement is vital.

Mission oriented customers are highly reluctant to break from a queue so having products 'within arms reach' is proven to drive sales.

The answer is 'managing traffic flow' by using a well thought out and merchandised queueing systems. This is particularly relevant to Small Format Retail, but also Retail in general.

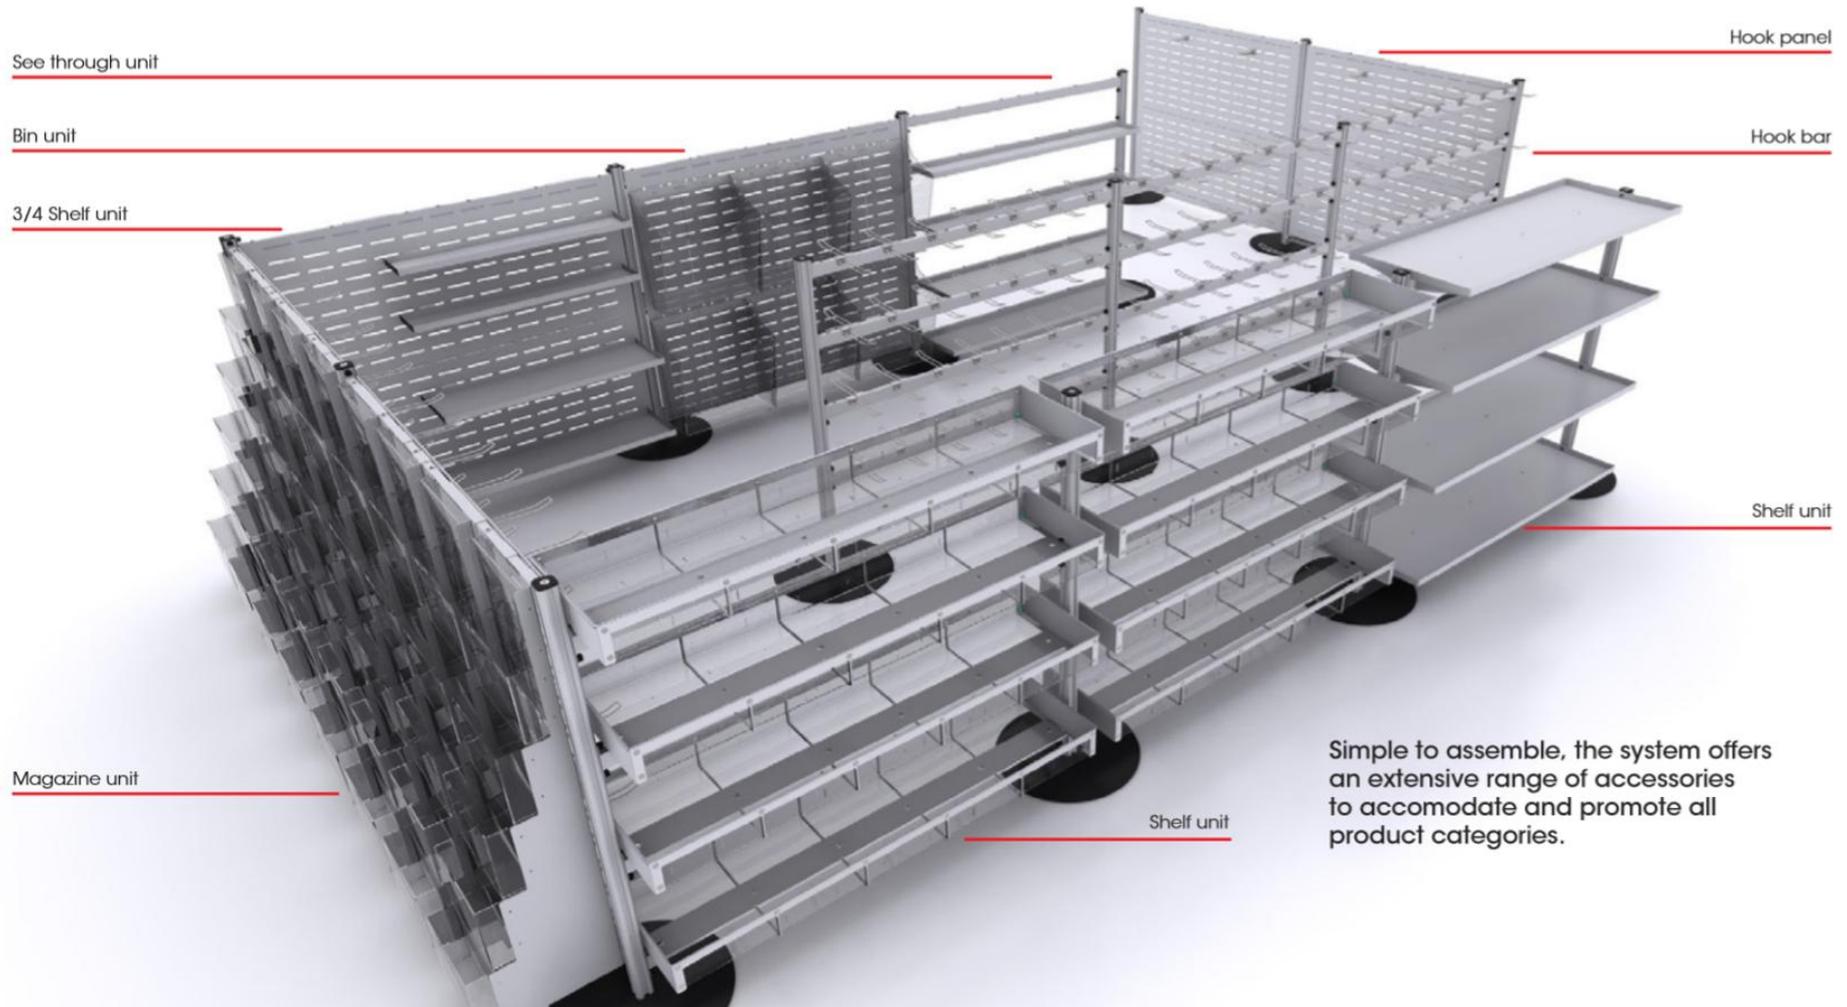

Ikea are the masters of managing customer movement and using impulse to start the sales process.

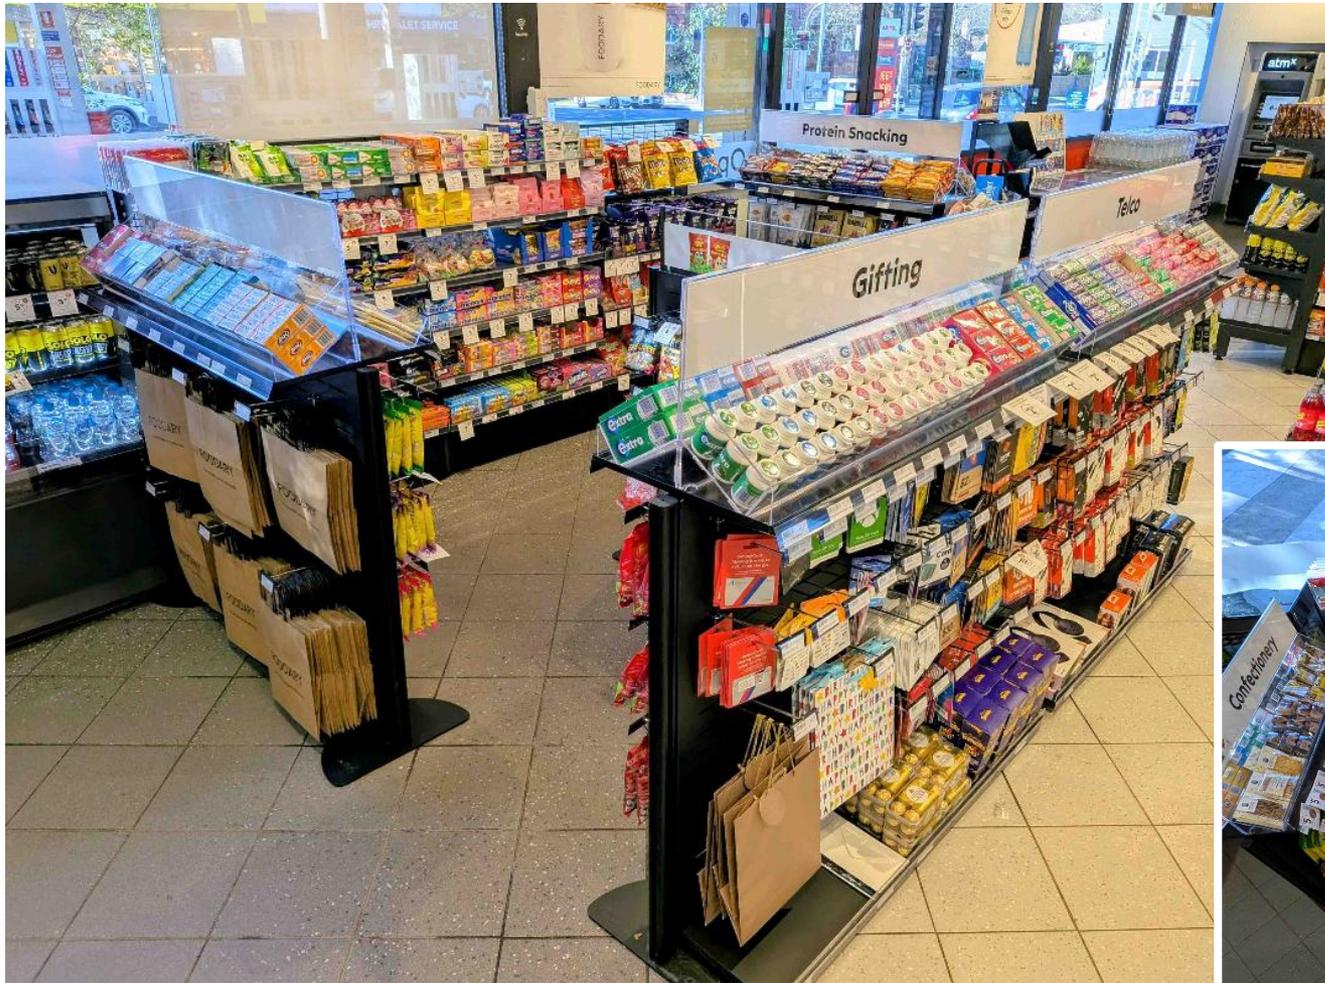

Our systems ...

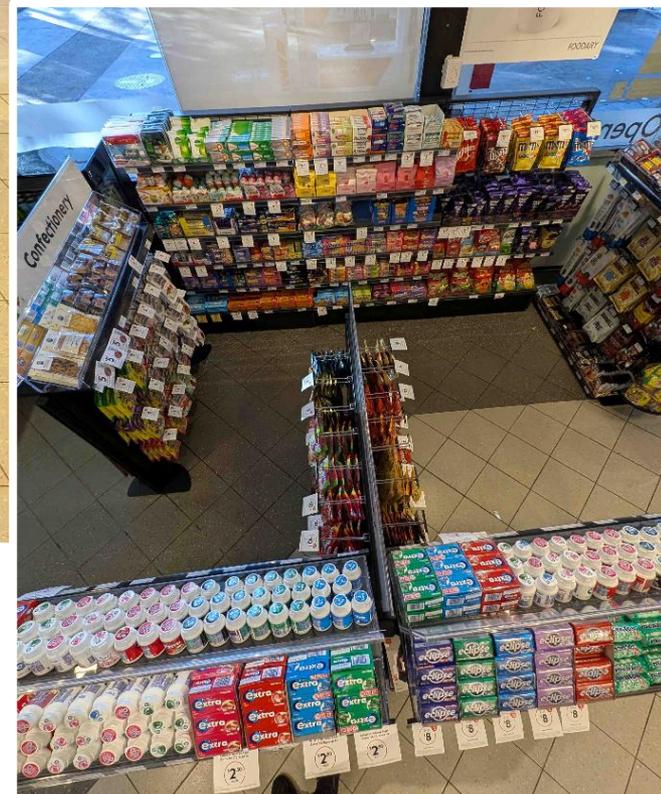

Modular merchandising solution which is made up of a suite of elements to suit your impulse strategy. Custom components can also be designed.

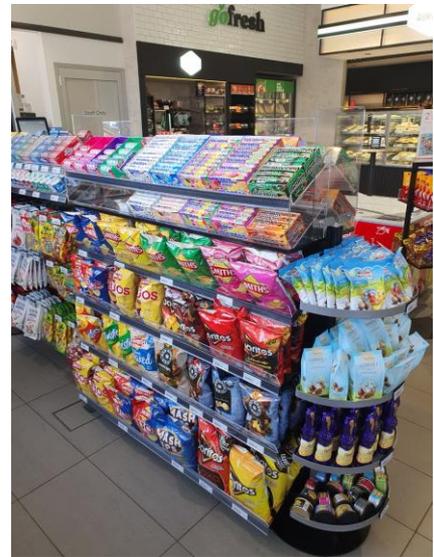

Simple to assemble, the system offers an extensive range of accessories to accommodate and promote all product categories.

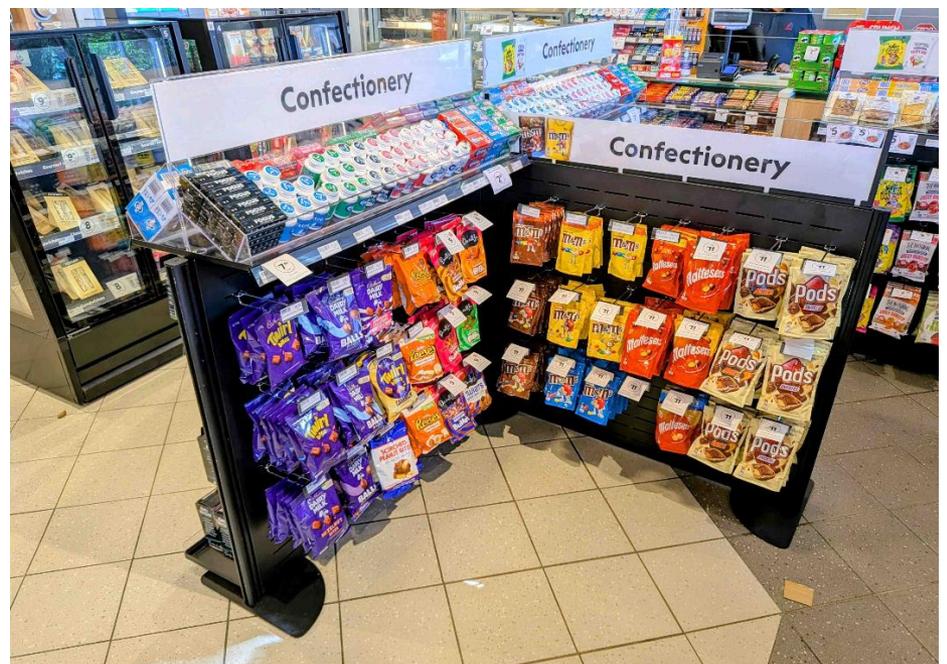

**Complete management
of traffic flow**

Single run and angled topper leading to the pay point
